MARTÍN RAYGOZA HUIZAR

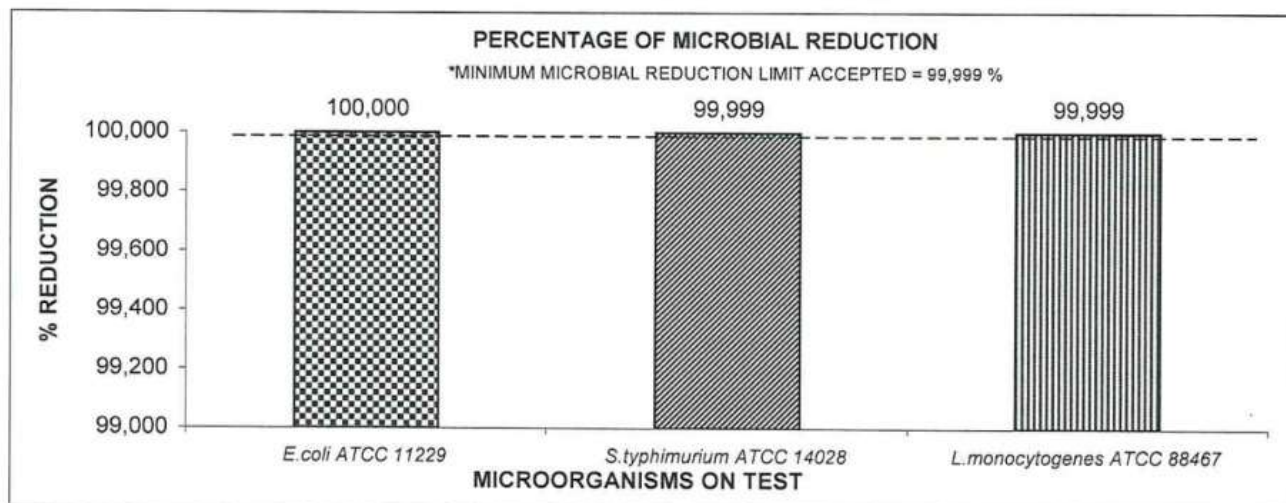

FRAY MARJIL DE JESÚS No. 13
COL. CENTRO
46180 TOTATICHÉ JALISCO

Report elaboration date:	01/18/2017
Sample's reception date:	01/05/2017
Test date:	01/05/2017
Sample number:	0131/17
Lot number:	S/L
Report number:	0131
Sample identification:	ASTRINGENT 1

ANTIMICROBIAL ACTIVITY

Antimicrobial activity's test is based in determinating the reduction percentage of an specific number of certain microorganisms, when they get to contact with a germicide, under specific test conditions and at a known concentration, determinated by the client.

% OF INOCULATED PATHOGENS REDUCTION IN A SOLUTION OF COLLOIDAL SILVER DURING 30 SECONDS OF CONTACT		
MICROORGANISMS ON TEST	CONCENTRATION OF COLLOIDAL SILVER	% OF REDUCTION
<i>E.coli</i> ATCC 11229	0.05%	100,000
<i>S.typhimurium</i> ATCC 14028	0.05%	99,999
<i>L.monocytogenes</i> ATCC 88467	0.05%	99,999
